

MAKE Jeep
MODEL Wrangler

DRIVETRAIN

Engine: Cummins Repower R2.8L Turbo Diesel
Transmission: Original NV3550
Original 3.73 axle gearing

MISCELLANEOUS

Jeep is the first test vehicle built for Cummins Repower Engine installation and adapters by Axis Industries USA Major frame rust and damage had to be repaired.

Alpha test engine made from scrap parts and handmade wiring harness put together in spare time by Cummins employees for the proof of concept.

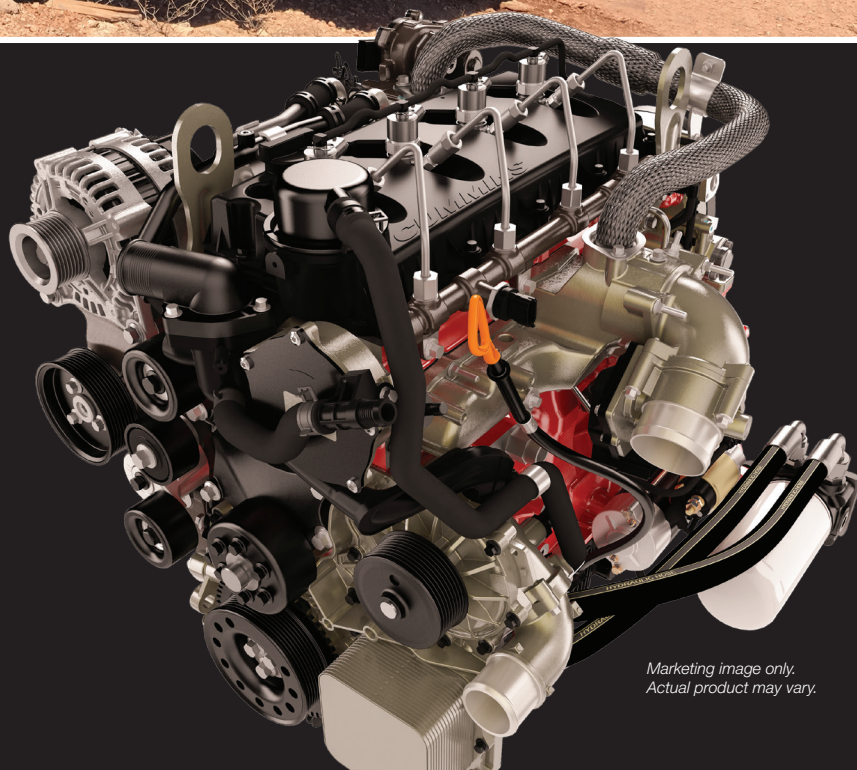

Used to refine calibration for emissions testing in chassis lab and real world driving

Alpha engine swapped for BETA production crate engine and wiring harness

Upfit with aftermarket bumpers and suspension lift for Easter Jeep Safari 2017

We've put about 20k miles on it in the year we've been driving it and it has never left us stranded

Maiden voyage the day the Jeep was completed was a 6 hour drive to Toledo, Ohio for the first "Jeep Fest"
