

B+ UPGRADE KIT

PART # 17206
FOR USE WITH
JAKE BRAKE MODEL C346B

Now you can upgrade your C346B Jake Brake retarder to give you more slowing power and greater reliability. Using Jacobs technology you get more horsepower at a fraction of the cost of a new engine brake.

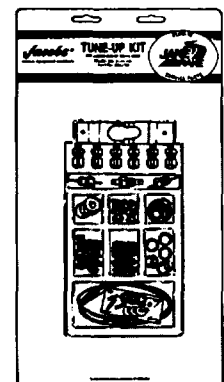

- 20 HP More Retarding @ 2100 RPM
- Improves Reliability
- Retrofit on Any C346B Jake Brake

Each kit includes two new pedestals, six new adjusting screws and instructions on a new lash setting - everything you need to upgrade your complete Jake Brake.

If you have more than 300,000 miles on your Jake Brake, we suggest you include a Tune-Up Kit (Part # 14087) in your plans for even greater horsepower.
