

Jacobs Engine Brake Model 5783A

For INTERNATIONAL A26 Engine Applications

Jacobs and International collaborated to increase engine braking performance by up to 67% at lower engine speeds utilizing the new Variable Geometry Turbo. This engine update improves driveability, increases foundation brake life, and lowers total cost of ownership in trucks equipped with the A26 engine.

Available on all International® LT, RH, HV, and HX vehicles, the Jacobs Engine Brake® comes factory installed when you order your vehicle or is available as a retrofit option. Contact your local International dealer for more information.

FEATURES

- Jacobs trademarked Jake Brake®
- Certified and approved by International
- Matches standard A26 base warranty
- Three stage engine brake operation, low/med/high
- Fully integrated with engine electronic controls
- Integrated with vehicle ABS for greater driver control
- Factory installed or dealer retrofit
- Compression release engine-mounted brake
- Quieter performing brake
- Two engine brake housing configuration for easy maintenance
- Product support through your local International® dealer

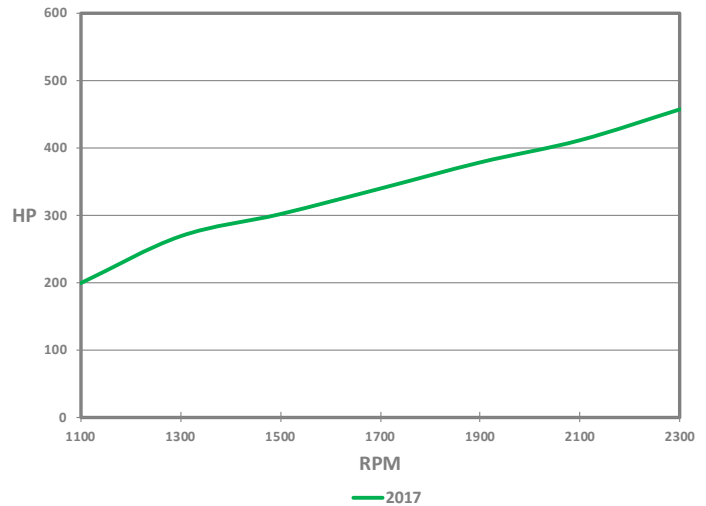

Jacobs Engine Brake Model 5783A for the INTERNATIONAL A26 Engine Applications

Performance Information

RPM	HP	Torque (ft-lbs)
1100	198	947
1300	268	1085
1500	301	1055
1700	339	1050
1900	378	1045
2100	411	1028
2300	457	1044

- Extra slowing power can reduce overheating and fading of service brakes.
- Increases service brake life up to three (3) times.
- Lowers maintenance costs and vehicle maintenance time.

Performance

- Additional downhill control of vehicle.
- Proven technology, durable and reliable operation.
- Improved brake performance at lower engine rpm.
