

Telematics Data Protection Notice

For Commercial Vehicles and Mobile Equipment

This data protection notice (“Notice”) is provided by Cummins to inform you about the data collection associated with the telematics device installed on your commercial vehicle or mobile equipment (collectively, “Mobile Equipment”). This Notice also describes Cummins’ data processing activities in connection with Mobile Equipment, including with respect to related digital applications, products, or services (collectively, “Telematics Application” or “Application”), should you choose to register.

Data Protection Laws

This Notice supplements and is provided in addition to Cummins’ Privacy Policy, available at <https://www.cummins.com/privacy-and-legal>. Please review the Notice together with the Privacy Policy to learn more about Cummins’ data handling practices, receive additional notices under privacy laws (including state and country specific disclosures), and rights that may be available to you.

Data Collected in Connection with the Telematics Device and Application

In connection with the telematics device, Cummins receives Telematics Data (defined below) in relation to your Mobile Equipment. To the extent that you’re a driver or end user of the Mobile Equipment, Cummins does not intentionally collect data pertaining to you in connection with Telematics Data, or attempt to identify you.¹ Nevertheless, certain Telematics Data may be considered personal information under applicable data protection laws.² If you register for the Application, Cummins receives Registration Data and Subscription Data (defined below).

- **Telematics Data:** The telematics device sends certain technical information to Cummins in the form of encrypted digital codes and letters pertaining to the functionality of the engine, powertrain, electric motor and/or battery (“key equipment components”) in the Mobile Equipment (“Telematics Data”). The Telematics Data collected by Cummins in connection with the telematics device is limited to that which is necessary and proportionate to the proper functioning of the key equipment components. The data includes relevant vehicle identification factors, such as the vehicle identification number and engine serial number; information about road conditions, such as terrain, outside temperature, humidity level/weather conditions; and information about the use of the Mobile Equipment, such as duration and period of use, speed, and acceleration/deceleration activity. Cummins may also receive GPS data related to the Mobile Equipment.
- **Registration Information:** When you register for use of an Application, Cummins will collect and process certain personal information, such as your name, email address, mailing address, and telephone number.
- **Subscription Information:** When you register for use of an Application, Cummins will collect and process data related to subscription, such as the dates of activation of your subscription and records pertaining to the alerts and notifications.

¹ In very limited situations, the driver/end user also owns or leases the Mobile Equipment, and/or interacts with Cummins in relation to repair or warranty services or contacts the company with questions.

² Cummins relies on the customers/owners of the vehicle to share this Notice with the drivers/end users as the customers/owners deem warranted.

How Cummins Uses Data Collected in Connection with the Telematics Device and Application

Cummins uses data collected in connection with the telematics device and related Applications for various purposes, including those described below or as otherwise authorized by you.

- **Provide You Services:** Cummins uses data collected in connection with the telematics device and related Applications to provide you related services, such as to evaluate the functionality, performance, and safety of the key equipment components, to facilitate the provision of software updates and product support, and to provide information to optimize the functioning, proper running condition, and safety of your Mobile Equipment to update you about maintenance, repair, and service needs.
- **Communicate with You:** Cummins may use this data to communicate with you about the services, including to inform you about related products and services.
- **Product Development and Research:** Telematics Data and Subscription Information is used by Cummins, where it is in our legitimate business interests, to improve its product development and research.

For avoidance of doubt, Cummins does *not* use data collected in connection with the telematics device and related Applications for any type of tracking the location of or profiling of drivers/end users. There is no automated data processing pertaining to the personal characteristics of the customers or users of the stationary equipment.

How Cummins Shares Data Collected in Connection with the Telematics Device and Application

Cummins may share data collected in connection with the telematics device and related Applications in certain circumstances, including those described below. Cummins will ensure that that persons authorized to process this data are subject to an appropriate duty or statutory obligation of confidentiality. Cummins does not sell or share, as those terms are defined under applicable data protection law, your personal information.

- **Cummins Affiliates:** Cummins may share data collected in connection with the telematics device and related Applications with Cummins-affiliated companies that help to provide these services.
- **Subprocessors:** Cummins may share data collected in connection with the telematics device and related Applications with subprocessors that help to provide these services. These subprocessors are required to uphold a consistent level of protection for the personal information and may only use the data for the purposes described in this Notice and Cummins Privacy Policy.
- **Legal Reasons:** In rare situations, Cummins may also be required to disclose certain data with regulatory or legal oversight agencies. If so, it will only disclose the minimum data required to respond, and where feasible, Cummins will take reasonable steps to notify the customer in advance.
- **Change of Control:** Cummins may disclose the data described above in connection with, or during negotiations concerning, any merger, sale of company assets, financing, or acquisition of all or a portion of our business by another company.

How Cummins Safeguards Data Collected in Connection with the Telematics Device and Application

Cummins has adopted reasonable technical, administrative and organizational measures designed to protect data from loss, misuse, alteration, destruction and unauthorized access. The safeguards are updated when new threats become known and in accordance with applicable law. Also, the telematics

devices are designed such that the security upgrades can be implemented remotely, without the need for a service call. Cummins retains the Data as long as is necessary to fulfil the purposes set out in this Notice and otherwise to comply with business and legal obligations, and then the data is securely and irreversibly destroyed.

Cross-Border Data Transfers

If you live outside of the United States, personal information collected by Cummins may be transferred outside of your home country, including to the U.S. where Cummins is headquartered, and to cloud storage centers operated by U.S.-based level A storage providers.

Cummins upholds cross-border data transfer requirements in a manner consistent with the laws and requirements in the countries where the telematics devices are used. For more information, please visit the Cummins Privacy Policy available at: <https://www.cummins.com/privacy-and-legal>.

If you live in Canada, some personal information may be transferred to, processed in, or stored in countries outside of Canada. If you live in Quebec, your personal information may be communicated to and processed by entities outside of Quebec. Accordingly, your personal information may be accessible to courts, law enforcement and national security authorities of those countries.

For more information, or to obtain further written information about our policies and practices respecting third party service providers or affiliates located outside of your home country or territory, please see the contact information provided below.

Rights in Relation to the Data Collected in Connection with the Telematics Device and Application

To the extent that you provide personal information to Cummins in connection with this Notice, you may have certain data privacy rights. For more information or to exercise privacy rights that may be available to you, please visit the Cummins Privacy Policy or use the contact information below.

You can also choose whether to receive alerts from Cummins about maintenance and repair needs for your Mobile Equipment which are identified through the review and analysis of Telematics Data. You can also terminate the Application services and opt-out of the collection and processing by Cummins of Your Subscription Information, subject to any data retention obligations we may have under the law. If You would like to opt-out, please email ConnectedSol.Support@cummins.com.

Additional Information or Questions

You can contact Cummins at dataprivacy@cummins.com for data protection-related questions. Cummins values your interest in our products and services.
