

X3.3 RANGE: 33-38 kVA

ADAPTABLE POWER. SMALL PACKAGE.

WHAT MAKES THE X3.3 SPECIAL

The impressively compact, Europe-built X3.3 has a footprint of just 1.6m². That's a lot of power in a small package. The optimized dimensions reduce your transportation costs too. And with a stackable design, storage is easier, which is good for your warehousing costs. X3.3. Small, but so adaptable to today's power needs.

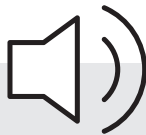

ALL THE ADVANTAGES

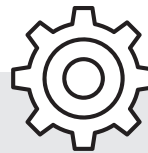

SMALLER AND LIGHTER

Improved power to weight ratio with excellent efficiency.

SOUND ATTENUATED

Quiet in operation and fully CE compliant meaning a lower noise environment for users once installed.

OPTIMIZED SUBSYSTEMS

Very simple to operate and use.

EASY TO MAINTAIN

You can service the X3.3 easily and get it back in service faster, reducing downtime to a minimum.

CUMMINS RELIABILITY

Performance you can depend on even at high altitudes and extreme temperatures. Extended coverage is available on the comprehensive worldwide warranty.

ASSEMBLED IN EUROPE

High quality Cummins engineering, improved lead times, built to last.

ADAPTABLE POWER WHEREVER YOU NEED IT

Industrial | Construction* | Agriculture and farming | Hotels | Healthcare and hospitals | Residential and light commercial | Public infrastructure

Model Name	Voltage (V)	Frequency (Hz)	Standby Ratings		Prime Ratings		Engine Model	Standard Alternator
